

PRODUCTS CATALOGUE SANITIZING

BIOSAN "READY TO USE"

BIOSAN "READY TO USE" is an innovative product ready for use, for the sanitization of surfaces and environments, on steel and plastic supports, painted structures in metal and wood, bamboo and anodized and painted aluminium structures (it is preferable to do a small localized sampling), the product in its formulation has an excellent characteristic of eliminating fatty substances, greasing and eliminating organic substances.

The product is neutral, easy to rinse and is therefore suitable for any surface.

It has a broad spectrum of action and controls the microbial proliferation of Gam + bacteria yeasts and mold. It is neither toxic nor harmful, it allows a quick and safe use during its use.

Ideal product for work surfaces, support surfaces and equipment (tables, telephones, handles, toilets, footboards, showers, chairs, doors, electronic headboards, etc. ...).

Size: 250 ml con spruzzino - 750 ml con spruzzino - 1 lt. - 5 lt. - 25 lt.

SPEEDSAN

SPEEDSAN is a long-release active chlorine sanitizing detergent and a mix of surfactants, used for continuous cleaning and sanitation throughout the day on all washable, delicate and non-washable substrates.

SPEEDSAN is a ready-to-use formulation, to be used whenever it is necessary, for example to clean and sanitize chairs, tables, support supports in catering premises or to clean and simultaneously sanitize areas used for customer care, e.g. hairdresser chairs, make-up areas, massage beds, various aesthetic touch-ups, offices, meeting rooms, warehouses, operating stations, etc.

Size: 250 ml con spruzzino - 750 ml con spruzzino - 1 lt. - 5 lt. - 25 lt.

VCONTACT

Sanitizing Gel for skin ready to use, based on chlorhexidine. It has a balanced formulation of surfactants and sanitizing active ingredients designed for frequent hand decontamination in a production environment where hand cleaning is required.

Vcontact is gentle on the skin and allows immediate contact with food and surfaces in general without them being contaminated.

Areas of use: it is recommended in all industrial and commercial food processing activities such as supermarkets, butchers, fishmongers, delicatessens, kitchens, pastry shops, ice cream shop, bars, restaurants, food and non-food industries, as well as the daily use of people that can come into contact and therefore need safe and immediate sanitation.

Size: 100 ml - 250 ml - 500 ml - 1 lt. - 5 lt.

VGEL

Single-product sanitizing and detergent gel, to be used as a ready-to-use soap, based on Chlorhexidine, designed for the frequent decontamination of the hands in the production environment, where hand cleaning is required. Thanks to a balanced formulation of surfactants and sanitizing active ingredients, Vgel is gentle on the skin. After rinsing with clean tap water, it allows immediate contact with food and surfaces in general without contamination.

Area of use: it is recommended in all industrial and commercial food processing activities such as supermarkets, butchers, fishmongers, delicatessens, kitchens, pastry shops, ice cream shop, bars, restaurants, food and non-food industries, as well as the daily use of people that can come into contact and therefore need safe and immediate sanitation.

The product is used as it is, left to act for 20/30 seconds and then rinse with clean tap water.

Size: 250 ml - 500 ml - 1 lt. - 5 lt.

KEMIFORM "READY TO USE"

KEMIFORM "READY TO USE" is a benzalkonium chloride-based sanitizing detergent, a mix of alkyl-benzyl-dimethylammonium that make up the mixture of quaternary ammonium salts combined in synergistic action with surfactants and release agents, used for continuous cleaning and sanitation throughout the day on all substrates washable, delicate and not.

KEMIFORM "READY TO USE" is a formulation, to be used as often as necessary, for example cleaning and sanitizing bathrooms and washbasins.

Size: 750 ml con spruzzino - 1 lt. - 5 lt. - 25 lt.

KEMIFORM CONCENTRATO

KEMIFORM is a benzalkonium chloride-based sanitizing detergent, a mix of alkyl-benzyl-dimethylammonium that make up the mixture of quaternary ammonium salts combined in synergistic action with surfactants and release agents, used for continuous cleaning and sanitation throughout the day on all washable substrates, delicate and not. Concentrated product to be diluted in two phases before use, the dilution to be carried out is as follows:

first phase: dilute 1 liter of concentrated KEMIFORM with 4 liters of tap water.

second phase for use: As a sanitizer: use the product previously diluted, on the surface and leave to act at least 15 minutes. Or for daily surface hygiene: 50 cc of product previously diluted in a bucket of water of about 5 liters.

Size: 1 lt. - 5 lt. - 25 lt.
